

Information Seminar

With the introduction of the new standards, many clients are reporting concerns with managing the expectation of the standards, in particular standard 7, HR. MizziSoft have developed systems which can demonstrate that services are meeting various aspects of the service delivery expectation and assist with managing the roster, including other aspects relating to staff management.

Clare Dewan and Associates would urge clients to attend a free seminar to be held on Thursday 30th May 2019 to understand the services MizziSoft can provide. Refreshments, including lunch, will be provided. The cost of the services will also be detailed.

While I am not involved in the company, I am aware of the concerns being expressed by clients and therefore it may be worth your while to attend, to at least get an understanding of what is being offered.

Please email me to advise if you will be attending and for catering purposes, please do so no later than the 24th May 2019. I would also request that if you do indicate that you are attending, please do so as it is always disappointing to waste the catering.

Please send your acceptance to cdewan@cdassociates.com.au with the name of the facility/company and the names and positions and contact numbers of those who will be attending.

Please contact Clare dewan on 0412601156 to discuss or email for enquiries to cdewan@cdassociates.com.au.

Workforce Management Experts

FREE SEMINAR

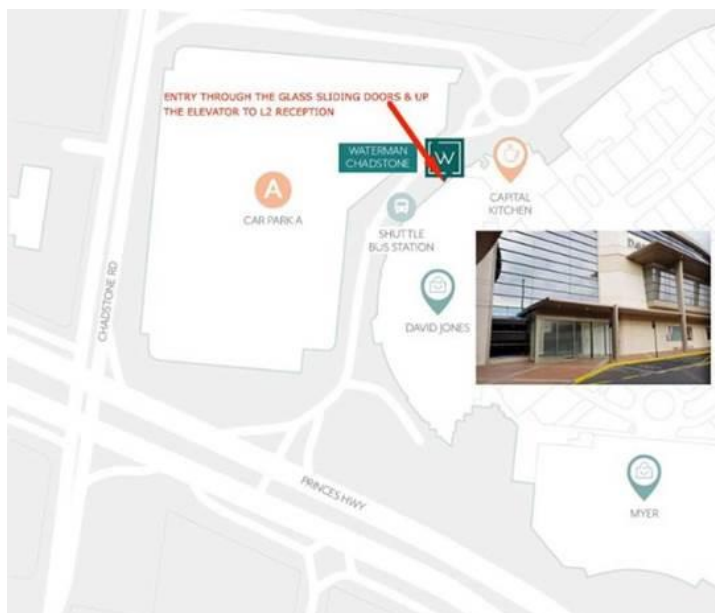

PRICING \$5 – \$20 per employee per month subscription fee

Our upcoming industry seminar is a great opportunity to understand HR as the new standard 7, how the requirements of the standard may affect your current operations and how the MizziSoft system can assist clients with the following:

- Notify service users of schedule changes
- Roster shifts that accommodate service user preferences (gender, choice etc.) as well as taking into account which staff are trained with each person, who is available
- A Rostering system that allows for variable travel times between service users for in home care providers
- Service user weekly rosters – being able to generate within a program
- Remote access
- Transition existing paper-based employee records to online
- Ability to track key certification expiries (e.g. WWC, First Aid etc)
- Online time and attendance tracking, specifically timesheets
- Online processes of key HR procedures, e.g. leave requests, professional development requests etc
- Employee Self Service

Open to service providers and in-home care providers the seminar program has been designed to bring you practical hints tips and tools to optimise the performance of your business, and to find out how MizziSoft can assist you deal with the issues that will affect your ability to show that you meet required standards. Join us for an informative session that delves into workforce efficiencies through the use of technology. As well as an essential update on improving workforce outcomes.
